

# JUTE MESH SOIL SAVER BLANKET

## DESCRIPTION

Jute Mesh is a biodegradable open weave erosion control blanket suitable for short to medium term erosion protection to batters and open drains where light water flows are expected.

Jute Mesh helps retain moisture and allows water and light infiltration to encourage vegetation growth.

## APPLICATIONS

Jute Mesh is suitable for batter protection, lining of swale drains and many applications of economical erosion protection prior to establishment of vegetation.

## INSTALLATION

Jute Mesh shall be pinned in place using Global Synthetics Retaining Pins available separately. Generally, one pin should be applied per square metre to fix the blanket to soil surface although this may vary from site to site and specific application requirements. It is important that intimate soil contact is made with the blanket.

## TYPICAL PROPERTIES

PROPERTY	JUTE MESH
Material	100% Jute Fibre (woven weave)
Bale Quantity	1.22m x 548m bale (670sq.m per bale)
Gross Weight	345 kg/bale
